THE ARTIST

LEE JAE-EUN

My work originates from viewing life as a landscape through the lens of memory.
For me, memory is not merely a record of the past, but a sense that re-examines the relationships and beings that shape who I am today.

In these landscapes, tiny stars symbolize the presence of cherished individuals whose light has illuminated my journey.
Their intersecting paths and shared warmth gather to form a vast constellation.

I define this world—where human lives become landscapes and illuminate one another—as 'Star Constellation Landscape' (성좌산수, 聖座山水).
It is a visual testament of gratitude to the countless lights that have passed through my life.
